Implementation of Health Professional Protection ACT 2066

• Nepalese doctors and the health institutions have been facing difficult and unpleasant situations. The moral of the doctors and their health service terms have degraded because of the growing number of attacks they have been encountering.

• NMA has been trying to draw the attention of the concerned authorities about the trend of rising violence against the health-care providers and to the overall negative impact to the health service. Therefore, recently health professional protect Act is implemented.

FEW CLICKS of EARTHQUAKE AFFECTED AREAS
After the Earthquake (Accomplishments)

• In the month of April, various regions of Nepal were hit by the massive earthquake. The need for medical assistance, equipment and relief materials were in high demand. Thus, NMA did their best to minimize the catastrophic effects of the disaster by providing relief materials, services and by organizing numerous medical health camps.

• NMA together with support from various supportive National and International organization organized Psychosocial Counselling Training Programs (AMDA International), health camps and medical/relief distribution for earthquake affected regions.
International Organizations Support to Earthquake Victims
Proposed activities of NMA
