• President Rai Mra - served as President of CMAAO for 2015 - 2016
• Delegates attended MASEAN meeting in May 2016
• China Medical Association Congress January 2017
• Plan to participate this year also
Advocacy and Advisory Activities

Advises to Ministry of Health in various national health issues

- PG training of GPs
- Ethical issues
- Health system reforms
- Food and Drug Administration
- Human resources development
- Medical registration fees
Patient Safety

- Patient Safety is being advocated by Many International organizations and Myanmar Medical Association is also actively working towards it.
Compulsory CME

• Myanmar is

Working towards Compulsory Medical Education for all practicing Myanmar Medical Doctors.
Challenges

- CME for GPs is also the main responsibility of MMA (Central) CME and GP society MMA,
- Reaching out to all Doctors in Rural areas & Districts is a challenge

- Supporting Medical Council for Accreditation System development
• For Doctors in “Hard to Reach Areas” online access might be the only option.

• (recent survey showed >90% of DRs have internet access)

• Some only use “facebook”. Young doctors don’t even use email.

• Any Experiences from other member Countries?
Challenges

• Political, social and economic changes in recent years lead to more demand on health care services (sometimes fueled by mis-using the social media) and more litigations towards doctors and hospitals and claims of medical negligence
Challenges

- Medical Defense Union - not established yet

- No Medical Protection Society

- Now Working to setup a “mechanism” for medico-legal assistance
How are other member countries’ Medical Associations facing these challenges. Some Shared Experiences would be helpful.
• Thank You
THANK YOU

terima kasih
